aïson EYEFIRE ALERT SYSTEM

aïson EyeFire is a state of the art solution for fire protection. It uses advanced AI Algorithm to "see" fire and smoke through your CCTV and alert in seconds from detection to your mobile, way before smoke become thick to reach the traditional smoke detectors.

Benefits of the EyeFire Detection System:

Early Fire/Smoke Detection

aïson eyefire alerts users via mobile providing more time for fire intervention and effective damage mitigation. You can pro-actively safeguard lives and property while minimizing the potential impact of fire incidents, 24/7.

Ultimate Artificial Intelligence

aïson eyefire uses advance A.I. algorithms to learn and each of your buildings' cameras, filtering false alarm from glare, haze, reflections, flashing lights etc. noises, ensuring only the most important fire/smoke alert reaches you
